# *the Family Communicator™*

**Created specifically for seniors to help them stay independent, healthy and connected to family and friends — allowing their children and caregivers to care and connect.**

## HELPING YOU LIVE INDEPENDENTLY AND STAY CONNECTED

Living life independently and staying connected in a technology-based world gets more difficult as we age. Receiving a digital photo or email is beyond many of us. Smartphone buttons and screens are too small and launching computer programs is too complex.

The CareConnect is the product you have been looking for to keep you connected to your children, grandchildren and friends. It is simple technology that fulfills your desire to be independent, helps you maintain your health and be in control — yet doesn't require technology skills.

- **Easily receive emails, photos and messages.**
- **Save photos** in emails to your picture frame with just a single key stroke...nothing to download or transfer.
- **Receive prescription and appointment reminders** and alerts to keep you in-touch and up-to-date.
- **Easy to use 7" Touch Screen**, comes pre-loaded with all software and features.
- **Simple connection** for video chatting with family or healthcare providers.

## CARE AND CONNECT TO THEM FROM ANY DISTANCE

Care for and connect to your parents or grandparents, whether they are around the corner or across the country.

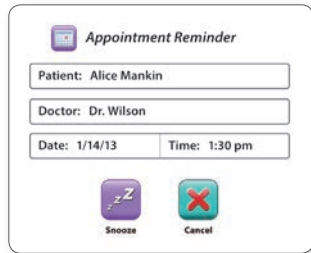

The CareConnect is the solution you've been looking for to keep your parents connected and engaged with their friends and family. It is intuitive to operate, with large buttons and touch screen icons. There are no programs to launch and it's wireless. It allows for effective communication with technology invisibility.

- CareConnect screen displays a digital picture frame or digital clock when not in communication mode, ensuring **it is always on and connected.**
- **CareConnect Apps for Androids and iPhones** enable you to remotely assist them with medication and appointment reminders.
- **The App also features CareText™**, a simplified email platform that fits perfectly into your and your children's texting communication style.
- **Motion Detector** enables you to respectfully be assured they are active.

# CARECONNECT™

# LIFE CONNECTED

## Appointment Reminders

Help with being on-time for doctor appointments, the hairdresser or even remembering a birthday.

Receive emails with a single large button.

Wireless Internet connection through in-home Wi-Fi hubs or an optional "just plug-in-the-wall" cellular hotspot.

Single large buttons for Home, Options & On/Off.

## Built-in camera, microphone and speakers.

Headphone jack for amplified listening.

## Medication Reminders & Alerts

Includes drug name, dose and time. Plus Medication Reports encourage taking medications on-time and can be easily shared with family or healthcare providers.

Call Me one-touch icon sends an SMS text message to family or healthcare provider, requesting a call back.

The Easy Grip stylus is comfortable for anyone to use.

Also available in red and black.

Digital picture frame feature that automatically scrolls family and friends photos. Stores up to 3,000 photos on a USB memory stick (included).

## Bluetooth™ Motion Detector\*

Confirms activity during the day or evening to provide peace of mind. Easily placed freestanding or wall-mounted in a kitchen, bathroom or hallway. Alternatively can be a security monitor, sending photos of activity when detecting motion.

\* Optional accessory. Bluetooth is a trademark of Bluetooth SIG, Inc.

## CareConnect Apps for Android & iPhone Smartphones.

Allows users to communicate remotely with the CareConnect. Send Appointment and Medication Reminders.

Perfect for families, caregivers or healthcare providers to monitor and assist.

Send simplified email communications with unique one-touch responses using CareText™.
